WELCOME
FROM OUR CHAIR

As Chair of the Department of Obstetrics and Gynecology, I have the privilege of leading a health care team dedicated to treating individuals across their lifespan. Training the next generation of physicians is one of three primary areas of focus in our department, alongside providing the highest quality of care and contributing to cutting-edge research. Our comprehensive training program aims to train residents across the full scope of obstetrics and gynecology, including robust exposure to adolescent gynecology, complex family planning, gynecologic oncology, maternal-fetal medicine, minimally invasive gynecologic surgery, reproductive endocrinology and infertility, and urogynecology.

With rotations through the NewYork-Presbyterian Alexandra Cohen Hospital for Women and Newborns, East 68th Street main campus, and David H. Koch Surgery Center, our residents gain valuable clinical experience in high-volume centers as we boast >8,000 deliveries per year and >3,500 gynecology cases per year. Residents also rotate through NYP Queens, where high-risk obstetrics and gynecologic surgery are the foci, immersing trainees in one of the most diverse patient populations in America. This diversity allows residents to actively engage in learning about health care delivery systems and the profound impact of social determinants on health.

Our faculty are world-class clinicians and enthusiastic educators. Many of them trained as residents at Weill Cornell Medicine and feel an even greater sense of responsibility to engage in both teaching and mentorship activities. While the majority of our residents go on to fellowship in an ABOG-approved program, with the intent of continuing their careers in academic medicine, some residents happily join general OB/GYN practices. All residents are encouraged to engage in research and usually complete one or two projects in their four years through a structured research curriculum with ongoing mentorship from a faculty member. Our research strengths include translational research in oncology and immunology as well as clinical research in perinatal mental health, cardiovascular disease, severe maternal morbidity, and community health. Large epidemiologic databases that exist for obstetrics and ultrasound also serve as great launching pads for research projects.

While residency is a demanding time in every physician's journey, our program supports several initiatives to promote resident wellness. After all, residents should take advantage of being in one of the greatest cities in the world! From Broadway shows to world-class museums, and the Hudson Valley only an hour away, New York City provides endless opportunities for fun and relaxation outside of work.

Thank you for taking the time to learn more about our residency program. We hope to meet you soon!

Laura E. Riley, MD
Chair, Department of Obstetrics and Gynecology
Weill Cornell Medical Center

PROGRAM **HISTORY**

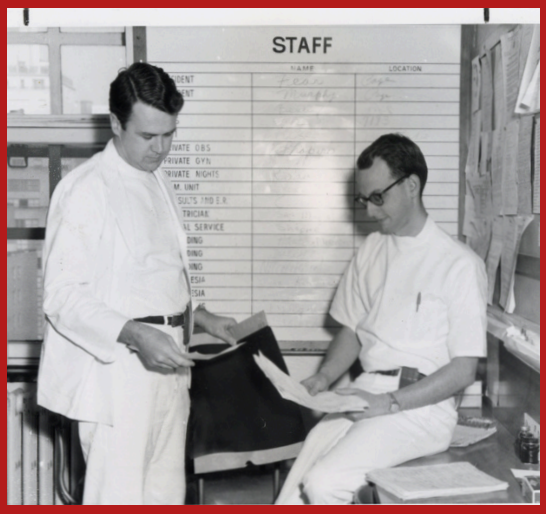

In 1898, students were welcomed to study Women's Diseases in the Department of Gynecology at Cornell University Medical College. They received their training at Bellevue Hospital, Women's Hospital, and the College's Dispensary. Separately, students received clinical training in obstetrics at Mothers and Babies Hospital in 1921. The two departments were combined to create the Department of Obstetrics and Gynecology, and in 1927, Cornell University became officially affiliated with the Society of New York Hospital. In 1932, New York Hospital-Cornell Medical Center opened with Obstetrics and Gynecology as one of the five major departments.

In 1934, a 5-year residency program was established for training doctors in Obstetrics and Gynecology.

Since then, Weill Cornell has continued to prioritize education and research. We are pioneers in healthcare as the site of the first use of laparoscopy in the country, of one of the earliest family planning clinics, and where the home pregnancy test was developed.

MISSION STATEMENT

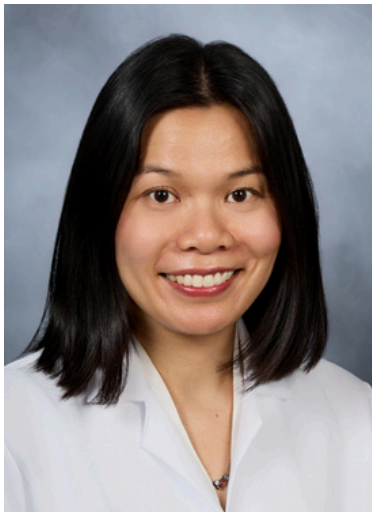

The Department of Obstetrics and Gynecology at NewYork-Presbyterian Weill Cornell considers education of the residents to be one of its most important responsibilities.

Our Residency Program is committed to training exceptional, compassionate, and inquisitive obstetrician-gynecologists who are grounded in evidence-based practice and dedicated to community engagement. We foster a diverse, inclusive, and collaborative learning environment where residents grow together—personally and professionally—while developing the skills to lead impactful careers as clinicians, educators, researchers, and advocates working to improve health outcomes.

MEET OUR
LEADERSHIP TEAM

WING KAY FOK, MD, MS

RESIDENCY PROGRAM DIRECTOR

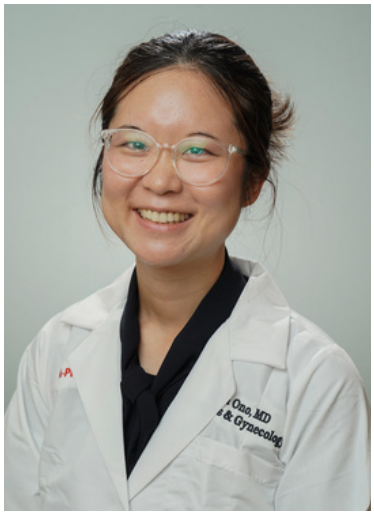

Dr. Wing Kay Fok is board-certified in Obstetrics and Gynecology and Complex Family Planning and is a Fellow of the American College of Obstetricians and Gynecologists. She graduated from Cornell University and received her medical degree from SUNY Upstate Medical University. Dr. Fok completed her residency in Obstetrics and Gynecology at The Ohio State University and her fellowship in Complex Family Planning at Stanford University, where she also earned a master's degree in Clinical Research and Epidemiology. She serves as the Residency Program Director and has been with Weill Cornell Medicine since 2019.

BARBARA MICHELLE STRONG, MD

ASSOCIATE RESIDENCY PROGRAM DIRECTOR

Dr. Barbara Michelle Strong is board-certified in Obstetrics and Gynecology. She graduated from Dartmouth College and received her medical degree through the Charles R. Drew UCLA Medical Education Program. Dr. Strong completed her residency in Obstetrics and Gynecology at Brigham and Women's Hospital and Massachusetts General Hospital. Her clinical areas of focus include comprehensive gynecologic care, gynecologic surgery, labor and delivery management, and contraceptive health services. Dr. Strong is passionate about residency education and obstetric simulation and has been with Weill Cornell Medicine since 2025.

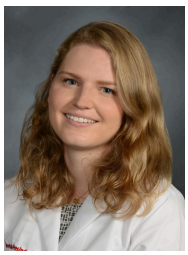

AIWA ONO, MD

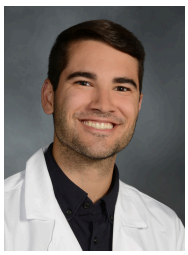

ASSOCIATE RESIDENCY PROGRAM DIRECTOR
NYP QUEENS HOSPITAL

Dr. Aiwa Ono is board-certified in Obstetrics and Gynecology and is a Fellow of the American College of Obstetrics and Gynecology. She graduated from the University of Hawaii at Manoa and received her medical degree from the John A. Burns School of Medicine with a Certificate of Distinction in Medical Education. She completed her residency in Obstetrics and Gynecology at SUNY Upstate Medical University. Her professional interests include management of acute obstetrical and gynecologic conditions, graduate medical education, and fostering the growth and development of resident physicians. Dr. Ono has been with Weill Cornell and NYP Queens since 2023.

CLINICAL CURRICULUM

1ST YEAR

We aim to develop a strong foundation in core areas, like Labor and Delivery and Gynecology. Interns will also have the opportunity to develop basic obstetric ultrasound skills.

Clinical rotations include:

- Benign Gynecology
- Gynecologic Oncology
- NYP Queens Hospital
- Night Float
- Obstetrics
- Ambulatory/Ultrasound

2ND YEAR

Residents continue to grow their breadth of knowledge and develop their clinical acumen by taking on additional responsibilities and through clinical exposure to various subspecialties.

Clinical rotations include:

- Benign Gynecology
- Cornell Antepartum
- Family Planning
- NYP Queens Hospital
- Night Float
- Queens Antepartum
- Queens Gynecology
- Reproductive Endocrinology and Infertility
- Urogynecology

3RD YEAR

In the third year, residents have flexibility during their elective and research rotation to further explore their career interests, either through research or specialized clinical training.

Clinical rotations include:

- Benign Gynecology
- Gynecologic Oncology
- NYP Queens Hospital
- Obstetrics
- Elective/Research
- Night Float

4TH YEAR

Our chiefs spend their final year refining their skills and assuming responsibility of managing each service as they prepare to embark on their next steps, whether a fellowship or generalist practice.

Clinical rotations include:

- Ambulatory
- Benign Gynecology
- Gynecologic Oncology
- NYP Queens Hospital
- Night Float
- Obstetrics

NEWYORK-PRESBYTERIAN
QUEENS

NewYork-Presbyterian Queens (NYPQ) is a 535-bed Level I trauma center in Flushing, New York. It is the only hospital in Queens with a 5-star quality rating distinction.

With over 70 nationalities in the borough, Queens is one of the most diverse neighborhoods in the country. The population of patients served at NYPQ has a low-middle socioeconomic status, with 80% of the patients coming from outside the United States and 70% identifying that English is not their primary language. Interpreter services are especially robust at NYPQ.

Access to care has been limited for many of our patients, and interactions with healthcare can seem transient. This may be for many reasons, like low income, lack of knowledge, or fear of entry into "the system." Disease may be more advanced on presentation due to limited access to preventative services.

Inequities such as food insecurity, housing insecurity, immigration fear, and work stress are realities that are navigated with our patients. The rewards of good care, good health outcomes, positive interactions, and making a difference are celebrated here!

The Weill Cornell OB/GYN resident team that comes to NYPQ is typically a five-person team. Under attending guidance and supervision, the trainees gain the opportunity of autonomous evaluation; robust gynecologic surgery, both minimally invasive and open; and complicated obstetrical issues and deliveries. Residents learn the nuances and realities of caring for the underserved and underrepresented. The total time spent at Queens represents approximately one-third of the four-year program, and the subsequent experience gained is invaluable.

"Training at two distinct hospitals provides an invaluable opportunity to care for diverse patient populations and experience different approaches to healthcare delivery. NYP Queens serves a richly diverse community, where we gain experience supporting patients as they navigate complex healthcare needs and barriers to care."

- Maria Som, Class of 2029

CONFERENCES & DIDACTIC TEACHING

MORBIDITY AND MORTALITY (M&M) CONFERENCE

Every Monday morning, residents present patient cases from obstetrical, gynecological, gynecologic oncology, and ambulatory services. Twice a year, residents present a Health Equity M&M Conference that focuses on the social influences of health that impact patient care.

GRAND ROUNDS

Immediately following the Monday M&M Conference, we invite distinguished guest speakers who are leaders in their field to present on a variety of topics, both virtually and in-person. Speakers are invited from across the country as well as internal faculty.

WISDOM WEDNESDAY

Every first Wednesday, residents in clinic are joined by nurse practitioners and faculty to review a high-yield OB/GYN topic.

QUEENS RESIDENT LECTURE SERIES

Every Wednesday morning, the residents and attendings at Queens gather for Journal Club, a structured educational session focused on critical appraisal and discussion of current and landmark literature in obstetrics and gynecology. Each session is led by a resident who presents and facilitates a discussion on selected articles. Attending physicians contribute by guiding practical application of the findings and fostering deeper understanding of the topic in context of patient care.

RESIDENT DIDACTIC LECTURE SERIES

Every Thursday morning, our residents have protected time to attend didactic lecture series, which supplement their clinical training and education. Faculty from all the divisions give lectures, and our curriculum is based on CREOG Education Objectives.

GYNECOLOGY PREOPERATIVE CONFERENCE

Every Thursday afternoon, our gynecology and ambulatory chief residents review planned surgical cases with Benign Gynecology, Minimally Invasive Gynecologic Surgery, and Gynecologic Oncology faculty. Each conference concludes with a review of either a recent or topical article.

GYNECOLOGIC ONCOLOGY TUMOR BOARD

Every Friday, the residents on the Gynecologic Oncology services discuss complex patient cases with faculty, along with pathology, medical oncology, and radiation oncology teams.

CASE-BASED ASSESSMENTS

Each year, we dedicate an afternoon to conducting case-based assessment exams of our senior residents. These exams provide an opportunity to experience how to prepare for their oral exams and allows residency leadership to assess areas of strength and opportunity for improvement.

SKILLS ACQUISITION AND INNOVATION LABORATORY

We take immense pride in being able to provide a full scope, comprehensive simulation curriculum for our residents that is catered to their level of training. Divided by PGY class, residents have multiple sessions throughout the year. Among the most popular sessions are our cadaver labs and laparoscopic myomectomy simulations!

OBSTETRICS

In addition to reviewing obstetric topics during didactics, we incorporate simulation sessions that are dedicated to developing and strengthening individual skills for operative vaginal delivery, interpretation of external fetal monitoring, and perineal laceration repair. Our residents also participate in annual multidisciplinary simulations for shoulder dystocia and maternal code.

RESEARCH CURRICULUM

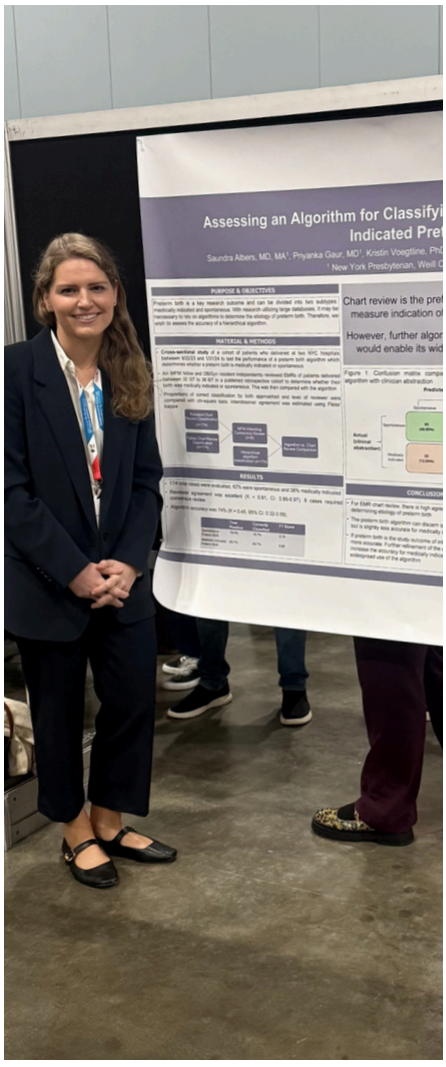

Understanding research and the evidence base for clinical practice is crucial to the training of all physicians. Thus, Weill Cornell offers comprehensive training in research methods and a rich, supportive environment for investigation and education. Didactic education in research methods is provided, along with active faculty mentorship and funding to attend conferences. Residents are required to play a substantial active role in at least one research project across the course of residency. Our goal is for residents to gain an understanding of how research projects are developed; how data are collected, analyzed, and interpreted; and how results of research projects are disseminated. Many residents choose projects based in our departmental Research Data Repository, a resource housing electronic health record data for all births at Weill Cornell since 2011.

PGY-1

- Didactic lectures: Research Expectations and Milestones; Introduction to Departmental Research Team; Library Services/Lit Review/Ref software; IRB Process; Introduction to the OB/GYN RDR; Statistical Services; Conducting Basic Science Research; Conducting Clinical Research: Hypotheses and Study Design; Writing Abstracts and Preparing Posters; and Clinical Research: Working with Mentors, Setting Goals, and Authorship.
- Research training: All residents must complete basic institutional online research training courses by the end of the PGY-1 year.
- Mentor identification: All residents are assisted to choose a faculty mentor during the PGY-1 year. Mentors will support research progress throughout residency.
- Research proposal: At the end of the PGY-1 year, all residents will present their research proposal to the entire faculty for feedback. This will include posing a research question, outlining an appropriate plan to answer this question, identifying content experts, and choosing a methodological approach to answer the question.

PGY-2

- Didactic curriculum: Attendance at Department of Biostatistics introductory lecture series.
- Mentors and departmental research team assist residents with IRB applications (if necessary) and residents begin data collection (if necessary).
- Residents meet with needed consultants and content experts and conduct any required literature reviews.
- Research team connects residents with initial biostatistical support to plan data analysis.

PGY-3

- Residents analyze data and prepare abstracts for conference submissions.
- Residents present research in progress to faculty panel (Vice Chairs of Research and of Education, mentor, and appropriate content experts) in February.
- Mentors regularly meet with residents to provide support and assess progress.

PGY-4

- Mentors regularly meet with residents to provide support and assess progress.
- Residents present findings at national conferences, like ACOG, SMFM, SRI, etc.
- Residents work with mentors to write up projects and submit to peer-reviewed journals.
- Residents give final presentation of project to entire department at the annual Robert Sassoon Chief Residents' and Fellows' Research Symposium in May.

ADVOCACY & ELECTIVES

Advocacy is not one-size-fits-all, and we encourage residents to explore how their unique experiences, strengths, and interests can translate into advocacy efforts. Opportunities range from writing letters to the editor and contacting legislators to implementing institutional changes and engaging in advocacy-focused research. In addition to formal didactics lectures, residents engage in small group advocacy workshops.

Our Advocacy Chief spearheads these efforts with support from the program director and department. Residents are also encouraged to participate in national and regional advocacy training opportunities, including the ACOG Congressional Leadership Conference and the District II Resident Advocacy Program.

Mayuri Patel and Hannah Peifer, Class of 2027, attended the 2026 ACOG District II Resident Advocacy Program in Albany, NY.

During the PGY-3 year, residents are provided with a dedicated elective block tailored to their individual career goals and interests. With approval from the program director, residents may customize this experience based on their professional plans and areas of interest.

Available electives include:

- Complex Family Planning
- Gynecologic Oncology at Memorial Sloan Kettering Cancer Center
- Infectious Disease
- Medical Intensive Care Unit
- OB Anesthesia
- Reproductive Mental Health
- Research
- Transgender Health Care
- Ultrasound
- Urogynecology/Urology

Amanda Leung, Class of 2027, attended the J&J Surgical Leadership Program in Ohio.

LIFE AFTER **RESIDENCY**

"I can confidently say that choosing Weill Cornell for residency was the best decision I made for my training. I enjoyed the high-volume surgical experience, strong academic environment, and the opportunity to care for a medically complex patient population. Throughout my four years, I was challenged to grow clinically and surgically, supported by incredible co-residents, and trusted to take on meaningful responsibility. Weill Cornell prepared me not only to match into fellowship, but to thrive in it."

- Samantha Spring, Class of 2025

"As an outgoing chief, I'm grateful for how Weill Cornell prepared me – as a surgeon, clinician, and leader. The depth and pace of the training, with a tight-knit resident community, gave me the confidence to take on anything. I'm headed to New Orleans as a generalist with a strong foundation and lifelong friendships."

- Tori Weprinsky, Class of 2025

CLASS OF 2026

- Gynecologic Oncology, Beth Israel Deaconess Medical Center
- Female Pelvic Medicine and Reconstructive Surgery, Yale School of Medicine
- Maternal-Fetal Medicine, University of Alabama
- Maternal-Fetal Medicine, University of Chicago
- Reproductive Endocrinology and Infertility, Stanford School of Medicine
- Generalist - Hartford, CT
- Generalist - Palo Alto, CA

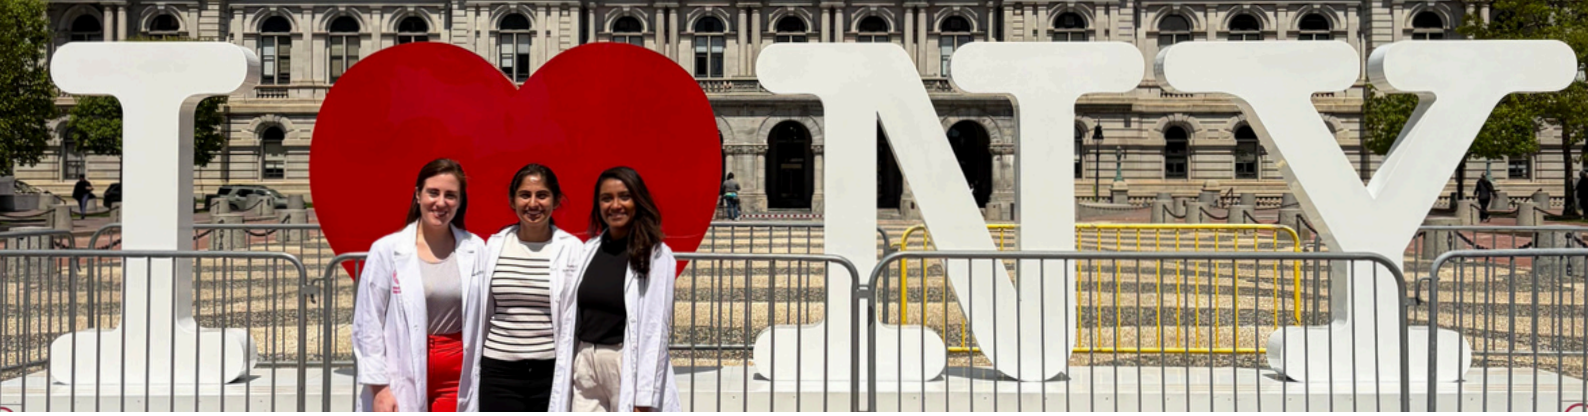

CLASS OF 2025

- Gynecologic Oncology, Brigham and Women's Hospital
- Maternal-Fetal Medicine, University of Alabama
- Reproductive Endocrinology and Infertility, Weill Cornell Medicine
- Academic Generalist - University of Maryland
- Academic Generalist - Weill Cornell Medicine
- Academic Generalist - NewYork-Presbyterian Queens
- Generalist - New Orleans, LA

CLASS OF 2024

- Gynecologic Oncology, Memorial Sloan Kettering Cancer Center
- Maternal-Fetal Medicine, Ochsner LSU Health
- Reproductive Endocrinology and Infertility, NYU Grossman School of Medicine
- Hospitalist - Pasadena, CA
- Generalist - New York, NY
- Hospitalist - Richmond, VA

RESIDENT LIFE,
SALARY & BENEFITS

LIFE IN THE CITY

The Upper East Side offers residents access to some of New York City's most iconic cultural destinations, including the Metropolitan Museum of Art, the Guggenheim Museum, and the Frick Collection. Residents can also enjoy the city's renowned food scene just blocks from the hospital, with even more culinary options to explore during the Queens rotation.

Broadway shows in Times Square, ice skating at Rockefeller Center, and countless other attractions are only a short subway ride away. Central Park is within walking distance of the hospital, and residents can even take the ferry to the beach during the warmer months.

Our program's wellness committee organizes events throughout the year, including spa nights, art therapy sessions, and group fitness activities such as Zumba, SoulCycle, and Rumble Boxing. Each spring, residents participate in a resident-only retreat designed to foster camaraderie, strengthen connections, and take full advantage of living in one of the world's most vibrant cities.

SALARY

GRADUATE STAFF LEVEL	SALARY EFFECTIVE JULY 2026
PGY-1	$96,600
PGY-2	$107,000
PGY-3	$115,700
PGY-4	$119,100

BENEFITS

We offer a comprehensive benefits package that supports residents' healthcare, wellbeing, financial wellness, and family needs. Additional benefits include:

- A $1,000 academic stipend that may be used for conference-related expenses and other academic activities.
- Transportation support through Lyft credits.
- An NYP meal card valued at $180 per month.
- Four weeks of vacation leave, taken in one-week increments.
- Housing options conveniently located near the hospital. For more information, please visit nyp.org/realestate

WHY WE CHOSE **WEILL CORNELL**

"At Weill Cornell, I receive top notch training with incredible support. The pathology is diverse, the teaching is strong, and the people make it all worth it. I feel constantly challenged and excited to grow here!"

- Robin Dean, Class of 2027

"I was fortunate to work closely with the residents and faculty during my sub-internship in medical school. During that time, I experienced a strong sense of camaraderie among the residents and had the opportunity to learn from exceptional surgeons, which made me even more excited to begin residency here."

- Kizzi Belfon, Class of 2029

"I wanted to be in a program where I was exposed to a high volume of patients with plenty of diversity both in pathology and patient populations. I loved the opportunity to learn at different hospital settings, and I wanted to be in an environment that had a tight knit resident community! Weill Cornell provided all of that and much more."

- Luiza Perez, Class of 2028

"As a rising chief, I have come to appreciate how much this program challenges us and supports us. The hands-on experience, surgical exposure, and strong resident camaraderie have made my first few years both intense and rewarding. I'm very excited for what's ahead."

- Spencer Darveau, Class of 2027

APPLICATION PROCESS

APPLICATION

If you are interested in applying to the OB/GYN residency at Weill Cornell, please submit an application through ResidencyCAS by September 17, 2026. Your application must include the following:

- AAMC-NRMP application for residency
- An official copy of your USMLE scores
- An official medical school transcript
- 3 or more faculty recommendation letters
- Letter from your school's dean

This application cycle, we have 6 categorical and 1 preliminary spot available.

INTERVIEWS

If you are invited to interview, you will receive a communication to schedule via Thalamus in late October. Interviews will be conducted virtually on the following dates:

- Wednesday, November 11, 2026
- Thursday, November 19, 2026
- Friday, December 4, 2026

Interviews are held in half-day blocks from 8a - 12p or 1p - 5p and include the following:

- An opportunity to meet the Chair and Program Directors
- A program introduction and virtual tour
- 3 faculty interviews
- 1 resident interview
- Interview with the Program Director

The evening before your interview date, we also welcome you to join us for an optional casual meet and greet via Zoom with our current residents. More information will be sent once your interview date has been confirmed.
